

Rapid Antigen Tests (RATs)

The following outlines the steps for using RATs for businesses

Key messages

- For general staff management protocols after a positive RAT result [see here](#).
- A negative RAT result does not guarantee you are COVID-19 free. All public health measures must be maintained including wearing face coverings, social distancing, hand washing and continuing to scan in at locations.
- For COVID-19 health advice, please call 0800 358 5453 at any time.
- If you develop any COVID-19 symptoms, however mild, you must immediately get a [standard COVID-19 test](#) and self-isolate until you get a negative result.
- Used RAT kits and PPE are considered medical waste and so must be disposed of safely in a zip-locked bag along with normal rubbish. Businesses with large volumes of medical waste should dispose of it in a biohazard bin.
- PPE requirements vary depending on the RAT kit used. Please make sure you follow all PPE recommendations. This includes the PPE requirements for any support person overseeing testing.
- Make sure you follow all of the RAT guidance, including clearing and cleaning the test area, blowing your nose and washing your hands.
